

ABOUT US

Bridging Voice is a 501(c)(3) nonprofit that empowers people with ALS (pALS) to maintain their ability to **meaningfully communicate** with family, caregivers, and medical professionals, no matter the stage of their disease.

We provide personalized technical support, one-on-one training, and access to advanced communication tools, including augmentative and alternative communication (AAC) technologies and AI-powered solutions. All of our services are provided **remotely** and **free of charge**, regardless of insurance status.

OUR MODEL

We believe that people should always be able to communicate, and we know simple interventions can make a **huge difference**. A personalized approach is key, and we **never give up** on a client. We offer:

TECH EVALUATION & ACCESS

Guiding clients to the best tools for their needs and helping them access equipment affordably and efficiently

REMOTE TRAINING & SUPPORT

Providing 1:1 training and tech support to keep pALS and caregivers confident with their devices as needs evolve

CUSTOMIZED SOLUTIONS

Building innovative customizations, from AI voice cloning to personalized software, to keep communication natural

PROFESSIONAL EDUCATION

Training clinicians and nonprofits to integrate assistive tech into care, improving outcomes for everyone

IN THEIR WORDS

What Bridging Voice does for those living with ALS may truly be one of the most important aspects of making ALS a livable disease until we have a cure.

— Cheri Mathis, LCSW
ALS Association

Imagine being tied in a chair with your arms taped to your sides and gagged so you can't speak! How does it feel? After five minutes? Eight minutes? Three hours? Now picture somebody coming in to free you. That's how I'd describe Bridging Voice.

— Francis F.
